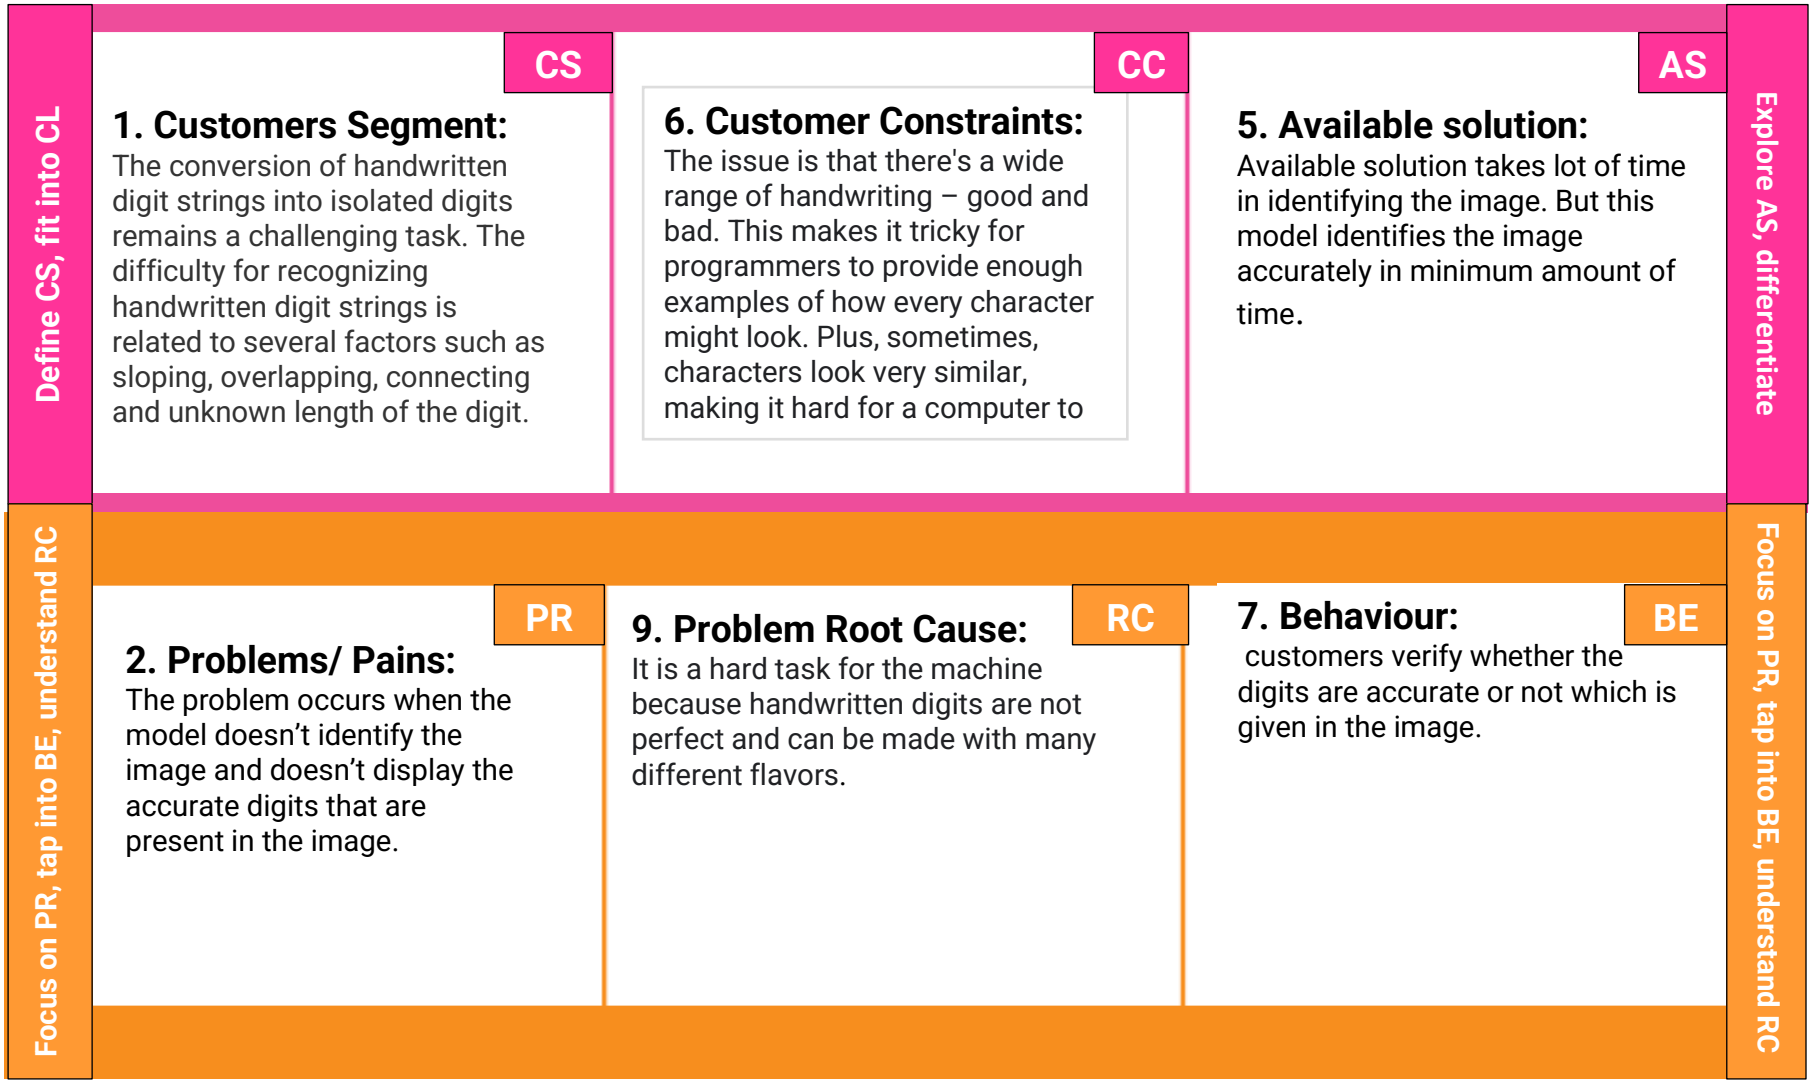
Project Title: A Novel Method for Handwritten Digit Recognition System

Team ID: PNT2022TMID39912



Identify strong TR

TR

SL

3. Triggers:

It basically detects the scanned images of handwritten digits. We have taken this a step further where our handwritten digit recognition system not only detects scanned images of handwritten digits but also allows writing digits on the screen with the help of an integrated GUI for recognition.

10. Your Solutions:

Existing solution takes time to identify the handwritten digits. But this model takes less time than the existing one. It will also display the accurate results for the handwritten digits shown in the image.
